- Built RESTful APIs that served data to our Javascript front-end based for several web applications, and hybrid mobile app.
- Built Monitoring back-offices for other services.

Used stack and tools:

VueJS, NuxtJS, ASP.NET Web API, Ionic RESTFull API, PostgresSQL, MS SQL Server, Linux VPS, IIS, Microsoft Eco-system, GitHub, BitBucket, Jira

PROJECTS

Autodrive.ma – Car Rental SaaS

- Built a full-stack web app marketplace for rental cars in Morocco. using Laravel, Livewire, VueJS, MySQL as a Stack.

Tabrro3.ma – Blood Donation Platform

- Built a full-stack simple web app for blood donation finding/sharing in Morocco. using Laravel, Inertia, VueJS, Vuetify, MySQL as a Stack.

3SP App – Password safe Desktop App

- Built a simple password safe desktop application to store, encrypt and export passwords. I used ElectronJS, VueJS, and SQLite for this project. Also, learned about encryption and security.
- This project allowed me to create another similar project, but for media files.
